

June - August 2025

Access London Theatre

How does it work?

Audio Description is a live verbal commentary providing information on the visual elements of a production as it unfolds. It describes action that is essential to the understanding of the story, as well as other information such as the style and design, sets, costumes, facial expressions and visual jokes. Description is delivered around the dialogue through a discreet headset.

At a **Captioned Performance**, the words are displayed on a screen placed near or in the set and can be seen at the same time as they are spoken or sung. Speakers' names, sound effects and offstage noises are also shown. A trained captioner prepares the script in advance to mirror the rhythm and flow of the performance and the captions are delivered live as the action happens on stage.

At **Sign Language Interpreted Performances** an interpreter will stand in a clearly visible position and interpret the spoken and heard aspects of the show.

Relaxed Performances are adapted in a number of ways to reduce anxiety and create a supportive atmosphere, including adjusting light and sound, providing 'chill-out' areas and embracing audience noise and movement. Relaxed performances could provide an opportunity for people with autism spectrum conditions, learning difficulties or other sensory and communication needs to access theatre in a relaxed environment.
